Appropriate engineering controls

Applies only to the product when used in an industrial setting. Explosion-proof general and local exhaust ventilation. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment**Eye/face protection**

Applies only to the product when used in an industrial setting. Wear safety glasses with side shields (or goggles).

Skin protection**Hand protection**
